APPENDIX.

Appendix to Agricultural Returns of Bengal for the year 1891-92.

Explanatory Memoranda of Differences in Excess of 10 *per cent. in the figures of* 1891-92 *compared with those of* 1890-91.

Table	Column heading.	District.	Figures of		Difference.		Explanation of difference.
			Previous year.	Current year.	Plus. +	Minus. -	
1	2	3	4	5	6	7	8
A (i)—2 ...	Forests...	Khulna ...	Acres. Nil.	Acres. 1,023,166	Acres. 1,023,166	Acres.	The Collector returned the area under forests as 1,134,629 acres, and remarked as follows :— "The figure was ascertained in the current year from the Sunderbans Commissioner. In the previous return the difference between the total area according to professional survey and the area estimated as under crops was shown as uncultivated. In the present return the correct area of forests has been given. The difference between the total area according to professional survey and the total of area under cultivation and forests consists of rivers and khals, land not available for cultivation, cultivable waste and current fallow ; but the area to be placed under each of these heads is not known." The correct forest area appears from the Forest Administration Report to be 1,023,166 acres, which is therefore shown in Table A2.
Do. ...	Uncultivated area	,, ...	2,234,182	Nil.	....	2,234,182	
A (i)—3 ...	Oilseeds	Jessore ...	134,282	80,000	.....	54,232	The area as reported in the oilseed forecast, 1891-92, has been shown.
A (i)—2 ...	Net area cropped	Rangpur ...	1,696,976	1,602,800	.....	94,176	
A (i)—3 ...	Rice	,, ...	1,265,937	1,279,200	13,263	.....	
	Wheat	,, ...	.....	51,600	51,600	.....	
	Barley	,, ...	... ..	7,000	7,000	.....	
	Gram	,, ...	.....	9,000	9,000	.....	
	Other food grains, &c. ...	,, ...	111,999	142,200	30,201	.....	
	Oilseeds	,, ...	67,878	80,600	12,722	.....	These differences are due to ordinary fluctuations in cultivation and errors in the previous returns.
	Condiments	,, ...	.....	6,400	6,400	... ...	
	Sugarcane	,, ...	118,787	115,200	.....	3,587	
	Jute	,, ...	424,244	283,500	.....	140,500	
	Indigo	,, ...	1.000	7,900	6,900	.....	
	Tobacco	,, ...	186,666	131,200	.....	55,466	
	Hemp	,, ...	.....	25	25	.....	
Do. ...	Oilseeds	Pabna	139,474	169,600	36,480	.....	Failure of rice crop increased the area sown under oilseeds, &c.
Do. ...	Jute	,, ...	150,000	120,000	.....	30,000	The low price of jute and high price of rice account for the decrease of the area under cultivation.
A (i)—2 ...	Net area cropped during the year.	Gaya	2,207,360	1,988,500	.....	218,860	The figures in this statement are compiled from the district forecast. The difference is due to a smaller area than usual having been cropped with winter and spring crops owing to drought. The figures are based on the forecasts submitted, which are taken as correct except in the case of opium and sugarcane.
A (i)—3 ...	Rice	Champaran ...	676,606	1,120,000	443,394	... ..	The difference represents the area under bhadoi rice which has now been added to aghani rice and shown in the return.
	Wheat	,, ...	34,400	47,000	12,600	.....	
	Oilseeds	,, ...	136 320	312,000	175,680	.....	The changes are due to revision of the estimates of crop-areas.
	Indigo	,, ...	62,543	54,000	.....	8,543

Table

Incidence of the land revenue on area and population

N.B—Under instructions contained in Board's letter No. 1220A., dated the 13th September 1893, column 2 of this Table shows the area of estates situated within the district boundaries but borne on the Revenue Roll of another district. This accounts for

Districts and Class of Tenure.	Total area by survey, less feudatories.	Deduct area not fully assessed, including estates assessed at privileged rates.	Balance of area fully assessed.	Total land revenue, excluding cesses of district (col. 2).	Population of district (col. 2).	Land revenue per head of population (cols. 5 and 6).

Table

Incidence of the land revenue on area and population

N.B.—Under instructions contained in Board's letter No. 1220A., dated the 13th September 1893, column 2 of this Table shows the area of estates situated within the district boundaries but borne on the Revenue Roll of another district. This accounts for

Districts and Class of Tenure.	Total area by survey, less feudatories.	Deduct area not fully assessed, including estates assessed at privileged rates.	Balance of area fully assessed.	Total land revenue, excluding cesses of district (col. 2).	Population of district (col. 2).	Land revenue per head of population (cols. 5 and 6).

Table

Incidence of the land revenue on area and population

N.B.—Under instructions contained in Board's letter No. 1220A., dated the 13th September 1893, column 2 of this Table shows the area of estates situated within the district boundaries but borne on the Revenue Roll of another district. This accounts for

Districts and Class of Tenure.	Total area by survey, less feudatories.	Deduct area not fully assessed, including estates assessed at privileged rates.	Balance of area fully assessed.	Total land revenue, excluding cesses of district (col. 2).	Population of district (col. 2).	Land revenue per head of population (cols. 5 and 6).

* Exclusive of Lohardaga, for which figures have not been supplied.

‡ The Board's Land Revenue Report for 1892-93 shows Rs. 3,83,34,397 (less quit rents from Feudatory States). The difference is in part accounted for by inclusion of the land revenue of the Chittagong Hill Tracts and Angul and Khondmals in this Table, which is not included in the Board's Land Revenue Report.

† Exclusive of Jalpaiguri and Lohardaga, for which figures have not been supplied.

in the year ending 31*st March* 1893.

Extracts from the General Administration Report for the year 1893-94, *relating to crops and prices.*

THE following extracts are taken from pages 125 to 129 of the General Administration Report for Bengal for the year 1893-94:—

Burdwan Division.—In the last year the monsoon set in earlier than usual, and the rainfall was above the normal. The excessive rain in May retarded the sowing of paddy, and the fall in June delayed transplantation. The heavy rain, however, was on the whole favourable to the crops, except in very low lands, which were flooded. The floods did most damage in the southern portion of the Midnapore district, where the *aman* rice over a small area was submerged and destroyed.

The price of common rice, which is consumed by the masses, was high in the earlier part of the year, but became cheaper in all districts after the winter crop was harvested.

The material condition of the people was generally good throughout the division, owing to the excellent outturn of the rice crop. In the south of Midnapore damage was done by floods.

Presidency Division.—The heavy rain of May interfered with sowings and caused a large area to remain unsown, while that of June and July submerged the young crops on low lands. As a result the *aus* and jute crops fell off, and while the *aman* on high lands did well, its outturn, taking the division as a whole, was below the average. The absence of winter rain caused the *rabi* outturn to be very limited, and in the case of sugarcane, indigo, and other crops, the outturn was poor.

The price of common rice, which is the staple food in the division, was almost stationary in Nadia and Khulna, lower in the 24-Parganas and Murshidabad, and higher in Jessore, as compared with the two preceding years.

Rajshahi Division.—The heavy rain in the beginning of the year seems to have damaged the jute crop in Pabna, Bogra, and Rajshahi, where it was estimated at 12 annas only; elsewhere it was up to the average. The *bhadoi* rice was also poor in these districts, and was good only in Rangpur and Dinajpur. Taking the division as a whole, the outturn of *bhadoi* rice was 13·8 and jute 14·6 annas only. The heavy rainfall was favourable to the winter rice crop, and the outturn is variously estimated from 15·5 annas in Jalpaiguri and Darjeeling to a bumper crop in Dinajpur, giving a divisional average of a little over 17 annas. The *rabi* crops and tobacco were more or less injured by the failure of the cold weather rains. The divisional outturn of tobacco is estimated at 12·5 annas, as also that of sugarcane. The ganja crop in Rajshahi gave a poor outturn (10 annas).

Although the harvests for two successive years were fairly good, the staple food-grains, particularly common rice, continued to sell at what in the last generation would have been thought the famine rate of twelve to fourteen seers the rupee.

Dacca Division.—From an agricultural point of view the year 1893-94 was not favourable; high floods and heavy rain damaged jute and both *aus* and *aman* rice crops, while the want of rain in the cold weather caused the outturn of pulses and oilseeds to be also small.

A violent and destructive cyclone passed over the south of the division on the 22nd October, affecting specially the Bhola and Patuakhali subdivisions of Backergunge. A severe storm also passed over the whole of the Dacca district in the latter part of May, while yet another violent storm was reported from Madaripur on the 18th March last.

The crops having suffered much injury, food-stuff had to be imported from abroad, and naturally there was a rise in prices. The price of rice, the principal food crop of the division, which rose in 1892-93 at times almost to famine rates, continued very high throughout the year under report.

As stated above, the crops were generally bad and the prices of food-grains very high. As the majority of the inhabitants of this division are producers of jute, food-stuffs and oilseeds, the high prices of these articles to some extent compensated them for short outturn.

Chittagong Division.—The year was characterized by extraordinarily heavy rain throughout the division. In Tippera and Noakhali there were two sets of inundations in July and August, those of August being the highest on record. A storm swept over the division on the 22nd October, doing damage everywhere. Naturally, the crops were poor and prices high.

Patna Division.—The rainfall of 1893-94 was greater than in either of the preceding two years, and was considerably above the normal, especially in Champaran. The year commenced well with light showers in April and May, which were favourable for the preparation of the lands for the *bhadoi* crop. Prospects looked very hopeful until excessive rain in June and July drowned and rotted the Indian corn, reducing what had promised to be a bumper crop to a 6 to 10-anna one, except in Saran, where there was almost a 16-anna harvest. But this heavy rain, though destructive to the *bhadoi*, was of great service for the winter rice, the general outturn of which was considerably better than for several years past. In Gaya and Saran the harvest was a 17-anna one; in Patna and Champaran the yield was over 15 annas, and it would have been equally good in Muzaffarpur and Darbhanga, had it not been for the destructive floods in those districts, which completely swept away the seedlings over very wide areas. In Shahabad the outturn ranged from 12 to 15 annas. The heavy rain in September and October left the ground too moist for the usual rabi sowings,

which were consequently retarded and somewhat restricted in area. Subsequently, the crop suffered from want of rain in December and January, and from untimely rain in February and high west winds in March. The rabi yield was better in the northern districts than in those to the south of the Ganges, where the winds in March made themselves more felt. Saran and Champaran did well with 15 to 16 annas outturn, while in Muzaffarpur and Darbhanga it was 12 to 13 annas. In Patna, Gaya, and Shahabad the outturn varied from 9 to 12 or 13 annas. The year was not good for opium and indigo.

The prices of good-grains ruled considerbaly lower than in either of the two preceding years, and this was due to the favourable harvests generally, but chiefly to the excellent rice crop.

Bhagalpur Division.—The rainfall of 1893-94 in all the districts was greater than that of the previous two years, and above the normal. The heavy rain in July caused injury to some of the *bhadoi* crops, and the yield of mahua and Indian corn was comparatively poor. The rainfall was favourable to the rice crops, both *bhadoi* and *aghani*, and an average outturn for the whole division was obtained. The cessation of rain during the cold weather somewhat interfered with the growth of the rabi crops; but the outturn on the whole was fair. The mahua, which is an important food crop in the Sonthal Parganas, did well.

The prices of all food-crops were generally cheaper than in the preceding year.

Orissa Division.—During the year under report the rainfall in each of the districts was far more than in the two preceding years and in excess of the normal. The rainfall was not only excessive, but very badly distributed to the detriment of several crops. In Cuttack, it is stated that on account of heavy and excessive rainfall, floods and a cyclone in the ploughing and sowing season, a part of the area for the *beali* and *sarad* never dried sufficiently to admit of cultivation. The outturn of the above two crops was estimated at not more than 9 annas on an average. The *rabi* was similarly affected by excessive rain at the time of sowing, and scarcity of rain afterwards. Excessive rainfall and floods are reported to have similarly affected the paddy crop in Balasore, where the outturn is reported to be 15 annas in the Sadar and 12 annas in the Bhadrak subdivision. In the district of Puri, floods in the early part of the rains are reported to have seriously affected the *beali*, *sarad* and sugarcane crops in the Sadar subdivision, where the outturn of the winter rice was estimated at 12 annas. The subdivision of Khurda was not, however, so much affected, the undulating character of the soil facilitating the draining off of the superfluous water. The outturn there was full 16 annas. The deficiency in the district was made up by the *dalua* crop, which does not depend on rain water, being grown on swampy places.

Owing to comparatively better harvests in Balasore and Puri, the prices of the staple food-grains were much easier than in the previous two years, being 17 seers 1 chitak in each, as against 16 seers 8 chitaks and 14 seers 15 chitaks in 1892-93, and 13 seers 7 chitaks and 15 seers 4 chitaks in 1891-92. In Cuttack the prices ruled high, the price of common rice having risen from 16 seers 9 chitaks in 1891-92 and 16 seers 3 chitaks in 1892-93 to 14 seers 14 chitaks per rupee in the year of report.

As noticed above, the year was rather favourable for crops, except in the Cuttack district, which appears to be in a normal condition of short crops, and has been so for the last three or four years.

Chota Nagpur Division.—As in other divisions, the rainfall in the Chota Nagpur Division during the year 1893-94 was excessive. The *bhadoi* and *rabi* crops suffered most, and their outturn, taking the division as a whole, was only 9 annas. On the other hand, the winter rice was a remarkably good crop in the greater part of the division, and its average outturn was 15 annas. The outturn of *mahua* and sugarcane was good.

Notwithstanding the good harvest of the year, the price of rice, except in Hazaribagh, remained much the same as, and in some cases was even higher than, in the previous year, owing, it is said, to heavy exports through the Bengal-Nagpur Railway.

Table A (i) of Agricultural Statistics of Bengal for the year 1893-94—General Return.

A 3.—Acreage under crops.		**A 3.**
English or Vernacular Names.		**Botanical names.**
Cereals and Pulses— 1. Rice	38,200,300	1. Oryza sativa.
2. Wheat	1,620,200	2. Triticum sativum.
3. Barley	1,048,200	3. Hordeum vulgare.
4. Cholum or Jowar (millet) ...	460,300	4. Sorghum vulgare.
5. Cumbu or Bajra (millet) ...		5. Pennisetum typhoideum.
6. Ragi or Mandua	802,700	6. Eleusine coracana.
7. Maize	2,031,600	7. Zea mays.
8. Gram (Pulse)	1,397,200	8. Cicer arietinum.
9. Other food-grains, including pulses.	5,395,300	9. Other food-grains, including pulses.
Oilseeds— 10. Linseed	777,200	10. Linum usitatissimum.
11. Til or jinjelly	520,000	11. Sesamum indicum.
12. Others	2,956,600	12. Others.
13. Condiments and spices ...	236,900	13. Condiments and spices.
Sugar— 14. Sugarcane	1,030,600	14. Saccharum officinarum.
15. Others	52,800	15. Others.
Fibres— 16. Cotton	201,200	16. Gossypium, Sp.
17. Jute	2,228,200	17. Corchorus, Sp.
18. Others	207,100	18. Others.
Dyes— 19. Indigo	614,200	19. Indigofera tinctoria.
20. Others	2,400	20. Others.
Drugs and Narcotics— 21. Opium	291,700	21. Rapaver somniferum.
22. Coffee	.....	22. Coffea arabica.
23. Tea	110,800	23. Camellia theifera.
24. Tobacco	730,500	24. Nicotiana tabacum and N. rustica.
25. Cinchona	2,900	25. Cinchona, Sp.
26. Indian Hemp	1,100	26. Cannabis sativa.
27. Others	.....	27. Others.
28. Fodder corps	129,700	28. Foddér crops.
29. Orchards and garden produce	889,800	29. Orchards and garden produce.
30. Mis. crops. Food ... ... Non-food ...	2,004,200	30. Mis. crops. Food. Non-food.
31. TOTAL ...	64,444,200	31. TOTAL.
32. Area cropped more than once	10,456,900	32. Area cropped more than once.
33. (31-32) Net area cropped during the year.	53,987,300	33. (31-32) Net area cropped during the year.

Appendix No. I to Agricultural Returns of Bengal for the year 1893-94.

Explanatory memoranda furnished by the District Officers of differences in excess of 10 *per cent. in the figures of* 1893-94, *compared with those of* 1892-93.

APPENDIX No. II TO THE AGRICULTURAL STATISTICS FOR BENGAL FOR 1893-94.

Notes on Table A (i) of Agricultural Statistics for 1893-94.

Burdwan.—The area under *til* (head II of Table A3) was returned by the Collector as 3,798 acres, which figure was said to have been taken from the *bhadoi* crops report for 1893. In that report, however, the area cropped with *til* in 1893 was shown as 5,340 acres against 5,798 acres normal. To these 5,340 acres have been added 3,200 acres shown under *rabi til* in the final report on oilseeds for 1893-94, making up a total of 8,540 acres, or in round numbers 8,500 acres, which figure has been now shown in Table A (*i*) for 1893-94.

Similarly, 11,190 acres shown by Collector as the area under jute in 1893 has been corrected to 11,000 acres, the former having been shown in the *bhadoi* crops report as well as in the jute reports of 1893 as the normal, and the latter (or more correctly 10,950 acres) as the actual area under jute in 1893.

Under Indian hemp the Collector showed 2,790 acres; as this area was meant for sunn-hemp, it has been transferred to cross-heading "other fibres," and added to 2,400 acres shown there by the Collector, thus making a total in round numbers of 5,200 acres.

The Collector showed 20,000 acres as under "Fodder" and explained that it was grass. Evidently grazing grounds were meant, and therefore the area has been transferred from cross-heading 29 of A3 to cross-heading 3 of A2 (culturable waste).

The Collector has not furnished explanations of differences exceeding 10 per cent. between the figures of 1892-93 and those of 1893-94.

Birbhum.—The Collector gives the following reason for raising his estimate of total cropped area from 459,000 and 455,500 acres shown in the returns for 1891-92 and 1892-93 to 900,000 acres as shown in the present return:—"According to the survey records of 1854-55, the total area of the district is 1,124,023 acres, of which 876,863 acres were cultivated and 247,160 acres uncultivated. Considering the increase of cultivation that has occurred during the past 30 years, we may fairly estimate 900,000 acres in round numbers to approximately represent the actual cultivated area."

The Collector says that no condiments, tobacco, or miscellaneous food-crops are grown in his district. The last include all vegetable crops which probably occupy a considerable area in the district.

An estimate of the area occupied by miscellaneous food-crops, which include vegetables, is wanting.

Explanations regarding differences exceeding 10 per cent. between figures of 1892-93 and those of 1893-94 have not been furnished in respect of several minor crops.

Hooghly.—The return received from this district was very imperfect and was accordingly returned for revision. Revised return not having been received, the figures shown in A(3) have been compiled from crop forecasts, and several figures shown within brackets have been taken from table A(*i*) for 1892-93. Several figures are still wanting and are indicated by query marks.

The estimate of net cropped area, 454,700 acres, appears to be very low.

24-Parganas.—291,070 acres have been returned as "area for which no returns exist." The area under Forest in 1893-94 was returned as 1,411,375 acres; but from the Forest Administration Report for 1893-94, the area under Government forest appeared to be 1,422,941 acres. The latter has been shown in the Provincial return, and the difference has been adjusted by reducing the area shown against cross-headings 2 and 3 of sub-table A(2) by a corresponding amount.

The estimate of net cropped area appears to be low.

Nadia.—The estimate of net cropped area appears to be open to great doubt. In 1891-92 this area was returned as 1,194,700, in 1892-93 as 710,900. It is inconceivable that the area under crop can have fallen to 582,200 only if the figures for former years were anywhere near to correctness.

Jessore.—The estimate of net cropped area is low and falls considerably short of that of the last two years.

Murshidabad.—The return received from this district is exceedingly imperfect. Several crops, *e.g.*, condiments and spices, fodder, and orchards, &c., and miscellaneous food and non-food crops were returned blank. The preceding figures for condiments and miscellaneous food and non-food crops have been therefore adopted and shewn within brackets. Double cropped area was also returned blank, and has been supplied from table A(1) for 1892-93.

Dinajpur.—The Collector reports that wheat is not grown in the district, although the neighbouring districts grow the crop more or less. *Til* is said to be grown to such a small extent as not to be taken into account. Under "orchards, &c.," only 200 acres are shown, which appears to be a very low estimate. "Miscellaneous food and non-food crops" are reported to occupy a very small area and are therefore returned blank. This statement is doubtful, considering that all vegetable crops grown in the field come under miscellaneous food-crops. *Gram* is also returned blank.

Rajshahi.—The decrease in the total net cropped area from 1,199,000 shown for 1892-93 to 1,027,200 is due to revision of estimates of areas under rice and six minor crops. Both the Collectors of Rajshahi and Bogra reported that three estates having an aggregate area of 1,936 acres were transferred from Bogra to Rajshahi, but as the interchange has not been yet reported by the Census office, the old district areas have been retained.

Til and other oilseeds were bracketed in the Collector's return and shewn to occupy 141,200 acres. 1,600 acres have been shown in the table under til and 139,600 acres under "other oilseeds" as shewn in last year's return of table A. Cross-heading 13 (condiments and spices) has been returned blank.

Rangpur.—11,900 acres were returned by the Collector under miscellaneous non-food crops. On enquiry, he stated that the crops referred to under this heading are bamboo and thatching-grass. Bamboo should have been included as groves in culturable waste (*vide* foot-note 5 to Appendix I to Resolution No. 1772Agri., dated 4th May 1892).

Bogra.—*Vide* remark under Rajshahi as regards the district area.

Pabna.—Miscellaneous food and non-food crops have been returned blank by the Collector.

Darjeeling.—1,500 acres reported to be under cardamoms and shown by the Deputy Commissioner against "Miscellaneous non-food crops" has been transferred to head "Condiments and Spices."

Jalpaiguri.—The area under forests was returned by the Deputy Commissioner as 287,590 acres. In the Forest Administration Report the area is shown as 286,112 acres, the latter figure has been accepted. An adjustment has been made in cross-headings 2 and 3 of sub-table A(2).

Dacca.—The percentage of cropped area is only 55·72. This is probably due to the fact that much of the "Madhupur jungle" is uncultivated.

Faridpur.—21,000 acres were returned under fodder crops, which on enquiry appeared to be grasses on chur lands; it is believed that these grasses are not cultivated, and therefore the 21,000 acres have been transferred to sub-table A (3) under "culturable waste."

An estimate for the area under "Other sugar crops," viz., date trees, is wanted.

Backergunge.—The area occupied by "Orchards, &c." (288,600 acres) appears to be high, even after allowing for the extensive betelnut cultivation; so also the area (122,600 acres) under "Miscellaneous food-crops," which

include a few vegetable crops. 32,000 acres have been incorrectly returned under "Miscellaneous non-food crops," which are said to include *bheran* (probably meant for castor-oil plant) and chilly, which is a condiment.

Mymensingh.—16,000 acres have been returned under "Miscellaneous non-food crops" which include thatching-grass, *jhau* and *gargazali* (?) *Jhau* can scarcely be called a crop, as it grows wild.

Tippera.—16,400 acres have been returned under "Miscellaneous non-food crops." These are stated to be thatching-grass, bamboos, ratan and fuel wood. Bamboo should have gone under culturable waste.

Chittagong.—In the return for 1892-93, 594,003 acres were shown as area for which no returns exist. In the Collector's return for 1893-94 this area was separated into 10,000 acres under rice, 4,220 acres under tea, 84,874 acres under forest, and 494,909 acres as area for which no returns exist. As the last-mentioned figure represents only uncultivated land, it has been shown against cross-headings 2 and 3 of sub-table A (2).

Only 1,700 acres have been shown against "Other food-grains including pulses." This estimate appears to be very low in comparison with the estimated area under these crops in the neighbouring district.

The area under tea in 1893-94 is returned as 4,900 acres. In the Bengal Government letter reporting the state of tea and coffee cultivation in these provinces during 1893, the area under tea in 1893 was shown as 4,272 acres, but very probably 3 out of the 28 gardens in the district were left out of account.

One hundred acres shown against "other drugs" has been omitted, as it is not known what crops were meant.

Chittagong Hill Tracts.—No returns have been received.

Patna.—The return is blank in respect of several crops which are known to occupy considerable areas in the district, *e. g.*, *marua*, Condiments and spices, "Other dyes, *e. g.*, safflower," Orchards, &c., and miscellaneous food-crops. The Collector is unable to furnish estimates of acreage under these crops, but promises to furnish them in future. *Bajra* is shown to occupy 5,200 acres; this is doubtful.

The Collector returned 14,900 acres under oats. As there was no separate heading for oats, and as this crop is mostly grown as food for horses, the acreage occupied by it has been shown against cross-heading 28, Fodder.

Shahabad.—Cross-heading 6 (*ragi* or *marua*) and 29 (orchards, &c.,) have been returned blank. The latter were included in cross-heading 30 by mistake.

1,000 acres were shown by the Collecter against "Other drugs." This appears to be a mistake, and the area has therefore been left out.

The double-cropped area is estimated at 10,000 acres only. This is too low, as the greater portion of the *bhadoi* lands bears *rabi* also.

Darbhanga.—Cross-heading 4 (*jowar*) in sub-table A (3) is returned blank, though this crop is believed to be grown in the district. The 8,000 acres shown under miscellaneous non-food crops are occupied by *sabai*, *kharhi*, and thatching-grass. *Sabai* is a fibre crop and ought to have been taken into account under "Other fibres."

Muzaffarpur.—Except under the heads of jowar, miscellaneous food crops and double cropped area the Collector seems to have repeated his figures of the previous year.

Saran.—The return is incomplete. Several cross-headings have been returned blank, but the Collector has promised to furnish statistics for the crops in question, *e.g. marua*, Condiments, Other dyes, Fodder, Orchards and Miscellaneous food-crops.

7,300 acres were shown under jute, which perhaps means patua or *Hibiscus cannabinus*. This area has therefore been added to 9,100 acres shown under "Other fibres."

Explanations of differences exceeding 10 per cent. between figures of 1892-93 and those of 1893-94 have not been furnished.

Champaran.—*Jowar* is returned blank, although in the neighbouring districts it occupies considerable areas. 100 acres returned under jute have been transferred to "Other fibres" as it is probable that the crop is not jute but *patua*. No fodder crops are returned for this district, and hence cross-heading 28 has been returned blank. Oats have probably been taken into account in cross-heading 9.

Monghyr.—The figures for maize, gram and other food-grains are apparently high.

Bhagalpur.—Oats are grown on the chars of the Ganges; the area under this crop ought to have been shown against cross-heading 28. It is doubtful whether the area of the 67,200 acres shown against miscellaneous non-food crops is correct.

Purnea.—The Collector returned the area of the district as 3,180,555 acres against 3,195,520 acres shown in the Census Report. The alteration is reported to be due to transfer of two villages from Purnea to Bhagalpur. The Census office not having yet reported the change, the old district area has been maintained. 25,500 acres are returned under miscellaneous non-food crops, which include *sabai* and *kus* grown for string; this acreage has therefore been transferred to heading "Other fibres."

Malda.—The estimate of cropped area appears to be low. 4,000 acres have been returned under *bajra* (cross-heading 5). The Collector says this crop is grown in the district. 50,000 acres shown as under miscellaneous non-food crops are reported to be occupied by mulberry, oats and thatching-grass; oats should have gone under *fodder*.

Sonthal Parganas.—The total area returned as cropped is considerably less than in the two preceding years and is possibly too low. The recent settlement operations may furnish a basis for a more correct estimate of normal cultivated area. 64,300 acres were shewn by the Deputy Commissioner jointly against *bajra* and *marua* (cross-headings 5 and 6). As *bajra* is not believed to be grown in the district, the whole of the above area has been shown against *marua* (cross-heading 6). 5,800 acres have been shown under "Miscellaneous non-food crops" which include thatching-grass and *sabai*. The latter ought to have been taken into account in cross-heading "Other fibres."

Cuttack.—665,469 acres were again shown this year against cross-heading 2 (*a*) of A (1) (area of Feudatory States). The Collector explains that this was the area of 11 Feudatory States which he names. From the Census Report the total area of those 11 States appears to be 8,055 square miles or 5,155,200 acres. The above area, 665,469 acres, has therefore been omitted from A (1), and only the area of the civil district, namely, 2,325,120 acres has been shown against cross-headings 1 and 3.

Angul and Khondmals.—489,915 acres have been returned in A (1) as area for which no returns have been prepared.

It has seemed desirable to follow the same course in the case of this district as with others, namely, to show the details of cross-heading 3 of A (1) in A (2). Accordingly the sum of the area occupied by Forests (160,380 acres), and the area cropped during the year (214,900 acres) have been deducted from 585,925 acres shown against cross-heading 3 of A (1), and the difference (210,645 acres) entered against cross-headings 2, 3 and 4 of A (2).

The figures in A (3) have been taken from the Deputy Collector's first return dated 20th July 1894. The second return, dated 27th September 1894, which professed to revise the first return, was an exact copy of the skeleton form, and was not intelligible when read with the text of the Deputy Commissioner's letter of 27th September 1894. Hence the figures in the Provincial return for Angul have been taken from the original return with some corrections.

The Deputy Commissioner says that "Condiments and spices" (cross-heading 13), and "Miscellaneous food and non-food crops" (cross-heading 30) are grown generally in orchards and gardens under which 7,000 acres have been returned.

Puri.—In A(2) details were given by the Collector of the area of the district according to village papers (cross-heading 4 of A 1), but as it appeared to be desirable to show the details of cross-heading 3 of A (1) in A (2), columns 2 to 4 have been bracketed and changed from 620,790 to 641,908.

Hazaribagh.—An enormous area (456,000 acres) has been returned under "Miscellaneous non-food crops." Reference was made to ascertain what crops are meant by these, but reply has not been yet received.

The double-cropped area (73,400 acres) seems small looking to the large areas cropped with such *bhadoi* crops as *maize* and *marua*.

Lohardaga.—The return received from this district is exceedingly imperfect. The Deputy Commissioner promised to send in a more complete return, but this has not been received. Some of the figures now shown have been taken from his return dated the 29th June 1894, while some have been reproduced from Table A (*i*) 3 of 1892-93 (in which it was noted that the Lohardaga returns were the most imperfect received from any district). These latter figures have been placed within brackets. The figure for tea has been taken from the Bengal Report on Tea and Coffee for the year 1893. The whole area returned as cropped is probably high.

Palamau.—The decrease in the total area cropped as compared with the figures returned for 1892-93 appears to be due to revision of estimate.

Manbhum.—The 22,000 acres entered against cross-heading 6 (*ragi* or *mandua*) also includes *bajra* (cross-heading 5) and inferior millets. For convenience of tabulation the figure has been entered against the main crop, namely *mandua*.

The Deputy Commissioner says that the area under double-crops is insignificant, whereas for 1892-93 he returned 119,000 acres as double-cropped; and cross-heading 32 has therefore been left blank.

Singhbhum.—In A (1), 375,000 acres was deducted by the Deputy Commissioner as the area of Feudatory States. Reference was made to ascertain what States this area refers to, and it was explained that the 375,000 acres were the area of two estates—Seraikella and Kharsawan. But as these States do not form part of the district, the entry (375,000 acres) against cross-heading 2(*a*) has been omitted, and the area of the civil district (2,421,900 acres) shown against cross-heading 1 and cross-heading 3 of A (1). The area under Forests in A (2) is returned as 654,807 acres. This is exclusive of 132,417 acres, which represent the area of the Porahat Reserve Forest. Evidently Porahat, which used to be regarded till recently as a Feudatory State, has been excluded from the Deputy Commissioner's return.

The Deputy Commissioner reports that "Condiments and spices" (cross-heading 13) and "Orchards and garden produce" (column 29) are not cultivated in the district, nor is there any area which is cropped more than once. These statements are doubtful.

Table A (ii) of Agricultural Statistics of Cadastrally Surveyed Areas in Bengal for the year 1893-94.

Showing total acreage, classification of areas, irrigation, crops, current fallows and stock

Weather, Crops and Prices of Food-grains, and Material Condition of the People.

(Reprinted from the General Administration Report for the year 1894-95.)

THE following is a brief account of the results of the harvests, of the prices of food-grains, and of the material condition of the people in these Provinces during the year 1894-95.

The *bhadoi* and *aus* crops.

The season was on the whole favourable to the crops harvested in the rains of 1894. For 7 out of the 45 districts a full or more than a full crop was reported; for 26 districts, the crops were reported as varying from 12 to less than 16 annas, and for 11 districts as varying from 8 to less than 12 annas. Only Manbhum reported less than an 8-anna crop. The general yield of the *bhadoi* crops was considerably better than in 1893, and was estimated by the Director of the Agricultural Department as up to the average. The yield of jute was above the average, and the indigo in Bihar was a record crop.

The winter rice crop.

The season was very favourable in most districts to the cultivation and growth of the winter rice crop, which is the most important crop of the year in these Provinces. Out of the 45 districts, 25 reported the crop to be a full average or better than a full average crop, 15 reported the crop as varying from 14 to under 16 annas, and 5 from 12 to less than 14 annas. No district officer returned less than a 12-anna crop. The general outturn was estimated by the Director of the Agricultural Department as 17 annas, or one anna more than the full average. Probably no better crop has been reaped in these Provinces as a whole in recent years.

Rabi crops.

The latter part of the monsoon season of 1894 was characterised by unusually late rain, which lasted till the end of the first week of November, and was particularly heavy in Bihar, Chota Nagpur, and North Bengal. The late rain interfered with the timely preparation of the land, and in many districts prevented the sowing of the whole of the usual *rabi* area. Only in five districts was the outturn of the *rabi* crop estimated to amount to 16 annas; 26 districts (including 10 of the 12 districts of the Patna and Bhagalpur Divisions, which together contain over 60 per cent. of the whole area, cultivated with *rabi* crops) reported crops varying from 12 to 15 annas; 13 districts reported crops varying from 8 to 11 annas, and one district, viz., Pabna, returned a 13 to 14-anna crop. The Director of the Agricultural Department estimated the general average of the *rabi* crops for the Province at 13 to 14 annas.

Price of common rice at the end of the year.

At the end of the year under report, prices of common rice were lower in every district than at the end of the year 1892-93, and lower in every district except Rangpur than at the end of 1893-94. On the 31st March 1895, the price of common rice ranged from 12 seers the rupee in Darjeeling to 24 seers in Manbhum. In 21 districts, it was selling at 14 to 17 seers; in 16 districts at over 17 seers to 20 seers; and in 5 districts, viz., Bankura, the three Orissa districts, and Manbhum, at over 20 seers. Only in three districts, viz., Darjeeling, Rangpur, and Hooghly, was the price dearer than 14 seers to the rupee.

The agricultural conditions of the year in each Division will now be separately noticed.

Burdwan Division.

The average rainfall in each district of the Burdwan Division during the last three years will be seen from the table below:—

	1892-93.	1893-94.	1894-95.
	Inches.	Inches.	Inches.
Burdwan	52·21	62·25	56·04
Birbhum	52·72	60·98	61·73
Bankura	50·80	72·21	58·58
Midnapore	52·59	72·46	64·76
Hooghly	53·82	72·86	54·15
Howrah	48·45	69·46	49·13

The monsoon set in late, but the rainfall was evenly distributed, as in the preceding year, and was favourable to the crops, except in parts of Burdwan and Midnapore, which suffered from flood. The outturn of crops, especially of rice, was above the average. In Hooghly district, exceedingly heavy rain fell in November, which generally benefited the crops; and the harvest in this district is said to have been the finest reaped for twenty years.

The good harvests of the year brought down the price of rice. The average price of common rice varied throughout the Division from 21 seers in Contai to 13 seers in Hooghly, chiefly according to the facilities for communication. In the last fortnight of March 1895, the average price of common rice was 17 seers 10 chitaks, against 14 seers 2 chitaks and 12 seers 1 chitak of the corresponding fortnights in 1894 and 1893. The *rabi* crops were not so universally good as the rice crops, and the prices of wheat and gram ruled higher than in the previous year, though much cheaper than in 1893.

In consequence of the abundant rice harvests of the year under report and the excellent crops of the two preceding years, the material condition of the people has been remarkably good. The labouring classes also benefited from the growing demand for labour created by the expansion of the coal trade, the increase in the number of factories, and the opening up of new industries. The wages of labour remained almost stationary except in Howrah, where the rate has increased.

Presidency Division.

The table below gives the average of the rainfall in each district of the Presidency Division during 1894-95 and the two preceding years:—

	1892-93.	1893-94.	1894-95.
	Inches.	Inches.	Inches.
24-Parganas	64·72	72·84	52·13
Nadia	50·10	71·70	60·46
Murshidabad	44·79	67·89	56·26
Jessore	61·44	65·04	58·66
Khulna	62·27	83·29	64·65

The fall in every district was less than in 1893-94, but the divisional average was slightly above that of 1892-93. The rainfall was especially well distributed in Jessore and Khulna, which had the best crops in the Division. The late rice crop was better than in the two preceding years in every district except Murshidabad, and the average outturn of the early and late rice crops for the year is probably understated at 15·1 annas and 14 annas for the whole Division. Abnormally heavy rain in October and November caused some damage to indigo, sugarcane, and lowland paddy.

The price of common rice, which is the staple food, fell by about one-fourth, as compared with the two preceding years, in all the districts except Murshidabad, where it rose slightly. In the last fortnight of March 1895, the average price of common rice was 17 seers 14 chitaks, against 13 seers 2 chitaks and 12 seers 7 chitaks in the corresponding fortnights of the two preceding years. The material condition of the mass of the people during the year under report was better on account of the good crops than in 1892-93 and 1893-94. The fall in the price of rice had no effect on the wages of labour, which are generally fixed by custom.

Rajshahi Division.

The following table shows the average rainfall in the districts of the Rajshahi Division as compared with the figures of the two preceding years:—

	1892-93.	1893-94.	1894-95.
	Inches.	Inches.	Inches.
Rajshahi	52·67	67·25	55·14
Dinajpur	72·33	81·74	72·43
Jalpaiguri	165·39	152·62	147·03
Darjeeling	136·78	129·37	117·88
Rangpur	97·85	80·92	63·10
Bogra	65·13	76·54	69·85
Pabna	63·30	80·30	61·93

The fall was below the mean of the two preceding years, but not in a very marked degree except in Rangpur. The monsoon commenced mildly, but there was heavy rain towards its close. The cold weather was dry, and the outturn of the *rabi* was therefore diminished; but as a whole, the harvests of the year were very little, if at all, below the average.

The price of common rice, which is the principal article of consumption, fell greatly towards the end of the year; but other food-grains continued to be dear as in the two previous years. During the last fortnight of March 1895 the average price of common rice for the Division was 15 seers 6½ chitaks per rupee, against 13 seers 2 chitaks and 12 seers 14½ chitaks in the corresponding fortnights of 1893-94 and 1892-93.

There was no marked change in the condition of the people in 1894-95. The crops were not quite so good as in the preceding year, and the price of rice ruled lower. The cultivators' profits were therefore somewhat less, though still very fair. The labourers gained something by the comparative cheapness of their staple food. Wages remained practically unchanged.

Chittagong Division.

The average rainfall in the districts of the Chittagong Division during the past three years has been as follows:—

	1892-93.	1893-94.	1894-95.
	Inches.	Inches.	Inches.
Tippera	78·27	85·12	78·57
Noakhali	116·16	145·74	117·83
Chittagong	82·45	146·39	112·57
Chittagong Hill Tracts ...	86·78	147·78	.....

The year 1894-95 was one of average and well-distributed rainfall. The floods of 1893 in the Tippera and Noakhali districts left layers of fertile soil, which increased the yield of the crops. The crops, except those of the cold weather, which was somewhat dry, were generally on the bumper scale. The distress caused in Tippera, by the floods of July and August 1893 and the storm of October 1893, ceased in July 1894, when an unusually fine crop of *aus* rice was harvested. On account of the good harvests, the price of common rice fell at the end of the year throughout the Division far below the price of recent years. In the last fortnight of March 1895, the average price of rice in the three plains districts was 19 seers and 9 chitaks to the rupee, against 11 seers 15 chitaks, and 12 seers 11 chitaks in the corresponding fortnights of the two preceding years. In the Hill Tracts also, the year was favourable to agriculture; and the main crops were better than they have been for the last two years.

Dacca Division.

The average rainfall in the different districts of the Dacca Division during the past three years will appear from the following table:—

	1892-93.	1893-94.	1894-95.
	Inches.	Inches.	Inches.
Dacca	64·64	74·14	69·47
Mymensingh	84·36	100·57	88·99
Faridpur	61·02	75·34	71·53
Backergunge ...	73·04	103·91	84·86

The rainfall was generally well distributed and favourable to all crops except *rabi*, which suffered from the unusually heavy rains in October and November, and subsequently from drought. The best harvests are reported to have been obtained in Faridpur and Backergunge, but the average of the winter rice crop for the whole Division is shown as $16\frac{3}{5}$ annas. The jute crop was also very nearly a full one.

In 1893-94, the partial failure of the rice crop in the low lands in Faridpur and Backergunge had caused some distress, and some minor measures of relief were undertaken in these districts. The *rabi* and *boro* crops of 1893-94 were good, and the *aus* crop of 1894 was almost a bumper one. On account of previous poor seasons, however, the price of rice, though falling, continued high until October 1894, when the *aman* crop began to come into the market. The price of common rice at the end of the year was the lowest on record since 1887-88. During the last fortnight of March 1895, the average price in the Division was 17 seers 11 chitaks, against 11 seers $8\frac{3}{4}$ chitaks and 11 seers $11\frac{3}{4}$ chitaks of the corresponding fortnights of the two preceding years. The wages of labour were almost the same as in 1893-94.

Patna Division.

The following table shows the average rainfall in the different districts of the Patna Division during the past three years:—

	1892-93.	1893-94.	1894-95.
	Inches.	Inches.	Inches.
Patna	42·36	50·04	59·01
Gaya	37·06	38·90	51·04
Shahabad	37·57	49·63	60·63
Saran	43·20	46·01	51·07
Champaran	62·83	78·66	54·38
Muzaffarpur	44·84	57·09	51·19
Darbhanga	46·39	56·29	51·05

In the three South Ganges districts, the rainfall was considerably over the average, especially in Shahabad. In the North Ganges districts, the fall was above the normal. The conditions in respect to weather and the outturn of the *bhadoi* and *rabi* crops varied considerably in the districts to the north and to the south of the Ganges. After a long drought, the monsoon broke favourably everywhere in June, but this was followed by a second drought in the north of Muzaffarpur and Darbhanga, while the rainfall in the southern districts proved excessive. Fortunately, good rain in August brought the second drought to a close in North Bihar; and in the end, the northern districts had better *bhadoi* crops than the southern districts. The winter rice crop, which is the chief crop of the year, was unusually good for the Division as a whole. Untimely heavy rain in October was not favourable for *rabi* sowing, but the subsequent months were all that could be wished. The northern districts, again, got the best crop, while the outturn in the southern districts was more or less poor.

The year was an unfortunate one for opium, which suffered from blight. On the other hand, both as regards yield and colour, it was exceptionally good for indigo. The price of rice rose very high for a time in Saran, and maize was dear throughout the year. Rice fell in price with the harvesting of the winter crop, and in the last fortnight of March 1895, the average price of common rice was 16 seers 9 chitaks to the rupee, or $1\frac{1}{2}$ seers per rupee more than during the corresponding period of the preceding year, and 2 seers 3 chitaks cheaper than in 1893. Gram was dearer than in 1894, but wheat was selling at about the same price. Maize was selling at 22 to $25\frac{1}{2}$ seers the rupee at the end of March 1895, as against $17\frac{1}{2}$ to 22 seers in the preceding year. There is a tendency for skilled labour in towns to command a higher price, but the wages of unskilled labour maintain from year to year much the same level.

On the whole, the year was decidedly a good one for the districts to the north of the Ganges, and an average one for those to the south excepting Shahabad, where it was somewhat below the average.

Bhagalpur Division.

The following table shows the average rainfall in the different district of the Bhagalpur Division during the past three years:—

	1892-93.	1893-94.	1894-95.
	Inches.	Inches.	Inches.
Monghyr	32·06	47·02	53·97
Bhagalpur	44·36	57·29	49·09
Purnea	81·05	85·28	73·84
Malda	50·73	68·95	60·42
Sonthal Parganas ...	46·91	65·32	64·92

The monsoon broke rather late, but was unusually prolonged into the month of November. There was then a complete absence of rain up to March. Heavy floods in July and August caused a considerable loss of *bhadoi* and early rice crops in Monghyr and Malda districts, but this was compensated by the good winter rice and *rabi* crops which followed; and on the whole the year may be said to have been one of abundant harvests throughout the Division.

The price of common rice fell in the latter half of the year. During the last fortnight in March 1895, the average price was 17 seers 15 chitaks, against 15 seers 8 chitaks and 15 seers in the corresponding periods of 1894 and 1893. Owing to improved communications, there is a continued tendency towards equalisation of prices.

Taking the Division as a whole, the condition of the people was, owing to good harvests, fairly prosperous. Wages of labour remained almost stationary: if anything, there is a slight tendency towards a rise.

Orissa Division.

The rainfall during the past three years in the districts of the Orissa Division is shown in the following table:—

	1892-93.	1893-94.	1894-95.
	Inches.	Inches.	Inches.
Cuttack	56·71	72·18	58·00
Balasore	54·75	73·58	67·56
Puri	51·31	68·60	53·43

The year was one of average and well-distributed rainfall; but considerable tracts were affected by the unusually high floods of the Mahanadi, Brahmini-Byturni, and the Subarnarekha in July and August on account of the heavy rainfall in the hilly tracts beyond the Division, where those rivers take their rise. In spite of the damages caused by the floods, however, the harvests were greatly in advance of recent averages. As usually happens, the deposit of silt left after the subsidence of the water in the flooded areas was favourable to the *rabi* and *dalua* rice crops that followed.

Owing to the short crops of previous years, prices were high from the beginning of the year till the harvesting of the *saradh* or winter rice. In July 1894, common rice sold as high as 13 seers per rupee, but during the latter half of the year the price fell greatly. In the last fortnight of March 1895, the average price for the Division was 22 seers 3 chitaks, against 16 seers 8 chitaks and 15 seers 14 chitaks of the corresponding fortnights of the two previous years.

The District Boards in Cuttack and Balasore gave some relief on a small scale after the floods in Balasore, but there was no general distress. The poorer tenantry continued to be in a state of chronic indebtedness to their zamindars and mahajans. Service in Calcutta and recently work on the East Coast Railway provide a livelihood for a number of persons, and pressure of population is further relieved by emigration to the waste lands in Gurjat; but the condition of agricultural labourers in Orissa is not satisfactory. Wages of labour remained much the same in Cuttack and Balasore, but fell in Puri.

Chota Nagpur Division.

The table below gives the average rainfall in the different districts of the Chota Nagpur Division during the past three years:—

	1892-93.	1893-94.	1894-95.
	Inches.	Inches.	Inches.
Hazaribagh ...	47·75	66·41	64·42
Lohardaga ...	59·38	60·49	64·54
Palamau ...	48·49	59·34	61·24
Manbhum ...	49·69	63·21	61·58
Singhbhum ...	48·65	63·81	55·44

The year began with very hot dry weather, which was followed, however, by seasonable and copious rain. The rainfall was above the average, and, except in Lohardaga, more evenly distributed during 1894-95 than in the preceding year. During July and August, the rainfall was abnormally heavy, causing some damage, especially in Lohardaga, to the early *bhadoi* crops, Indian-corn, *marua*, and pulses; but the loss was more than made good by the excellent outturn of the *gora* and winter rice, which, for the Division as a whole, were above the average, and in Palamau were bumper crops. The *rabi* crops suffered from the continued rainfall in October and November, and for want of moisture in December and January. The outturn of oilseeds and wheat was about 13 annas and that of *mahua* 14 annas, both being the same as in the preceding year. The outturn of sugarcane was on an average 12 annas.

A succession of good harvests has materially improved the condition of the agricultural classes, who form the bulk of the population. The condition of the non-agricultural classes has not equally improved except in such parts as are within easy reach of the tea-gardens, the railways, and the coal, mica and other mines. In Palamau, the trade in lac continued to expand; and the extraordinary rise in the price of this article brought a large quantity of money into the district. The trade in wood and *sabhai* grass in Singhbhum is also undergoing important expansion. The average price of common rice for the Division during the last fortnight of March 1895 was 17 seers $2\frac{1}{5}$ chitaks, against 15 seers $3\frac{7}{15}$ chitaks and 13 seers $14\frac{1}{5}$ chitaks during the corresponding periods of 1894 and 1893. The wages of labour increased in Palamau and Manbhum, but continued unaltered in the other districts.

Statement showing monthly variations in the Retail Prices of Food-grains and Salt in selected districts of Benga from April 1894 to March 1895.

24-Parganas.

APPENDIX No. I TO THE AGRICULTURAL STATISTICS FOR BENGAL FOR *1894-95.*

Notes on Table A(i) *of Agricultural Statistics for* 1894-95.

Burdwan.—No figures have been furnished by the Collector for cross-headings 2, 3 and 4 of sub-table A2. The blank has been filled up in the Director's office by subtracting "the net area cropped during the year" (1,179,800 acres) from the "net area by professional survey" (1,726,080 acres).

Birbhum.—There is a decrease of 15,000 acres in the net area cropped during 1894-95, as compared with that cropped in the previous year, which the Collector states is due to the fact that the estimate of 1893-94 included "village sites, tanks, garden and grazing lands," which have been excluded from the present estimate. The classification of areas under different crops in 1894-95 has been based by him on this revised estimate.

Midnapore.—The district area as shown in table A1 (3,319,040 acres) differs from that submitted by the Collector (3,167,389 acres), and is inclusive of river beds. The area entered against cross-headings 2, 3 and 4 of table A2 has been supplied in the Director's office.

The Collector remarks, that the decrease (23,100 acres) in the area under *til* for 1894-95, as compared with the area returned for 1893-94, is due to excessive rainfall which proved unfavourable to this crop. This is doubtful. It is possible, that areas under *bhadoi til* have not been included in the estimate submitted by the Collector. The Collector shows an increase against miscellaneous non-food crops of 28,000 acres as compared with the estimate for 1893-94, which he attributes to seasonable rainfall. The explanation is doubtful. Most probably other crops than mulberry have been included in this year's estimate. Seasonable rainfall is stated by the Collector to account also for the increase of 99,600 acres in the double cropped area, as compared with the return of last year. There must be other causes to explain this large difference. The decrease in excess of 10 per cent. of the area under "Other fibres" this year over that of last year has not been explained.

Hooghly.—The returns for this district, as for 1893-94, are imperfect. Revised figures were called for, but have not been received. The net cropped area returned is 90,500 acres in excess of the area returned for 1893-94, or nearly 20 per cent. in excess. The difference has not been explained. The net cropped area is probably still too low. It is not probable that only about 50 per cent. of the area of this district was under crops in 1894-95.

24-*Parganas.*—The total area of the 24-Parganas is returned by the Collector in table A1 as 4,150,020 acres, which include the Sundarbans. In the Census Report for 1891, the area of the district is shown as 1,344,640 acres only. The Collector has returned the area under "Forests" as 1,423,360 acres, but the area as given in the Forest Administration Report for 1894-95 is 1,422,941 acres. The latter figure has been shown in sub-table A2, and the area against cross-headings 2 to 4 of this sub-table have been corrected accordingly. The 291,070 acres shown as "the area for which no returns exist" represents a portion of the unreclaimed tracts of the Sundarbans.

Khulna.—In the Census Report of 1891, the area of the district has been shown as 1,329,280 acres. In table A1 it is shown as 3,103,942 acres as returned by the Collector. The latter figure includes the Sundarban area.

The Collector has given no explanation of the decrease of 50 per cent. in the area under gram for 1894-95. The Collector's explanation as to a decrease of 1,000 acres in the area under tobacco during 1894-95, as compared with the area under that crop during 1893-94, is not intelligible. The area occupied by "Miscellaneous non-food crops" appears very low. In the final report on the *bhadoi* crops, of 1894,

24,800 acres were returned for non-food crops, including jute and cotton. Deducting from this, the area under jute and cotton (17,800 acres), 7,000 acres would appear to be occupied by *bhadoi* non-food crops alone.

Nadia.—Last year the area under sugarcane was returned as 14,700 acres. The area as now given by the Collector is 13,200 acres. The decrease in excess of 10 per cent. has not been explained.

Jessore.—The net cropped areas as shown in the returns of Agricultural Statistics for the year 1891-92 and 1892-93 are respectively 1,116,800 acres and 1,065,800 acres. The corresponding figures for 1893-94 and 1894-95 are 914,400 acres and 952,600 acres respectively. The decrease has not been explained, but appears to be due to revision of estimate more than to any other cause.

Murshidabad.—The areas under wheat and indigo, as returned by the Collector, appear to be open to some doubt. It is stated by the Collector, that the estimates appear correct so far as information is available. No information is available to the Collector regarding areas under "Fodder crops" and "Orchards and garden produce."

Dinajpur.—The entry under wheat has been left blank by the Collector. It is reported, that wheat is not grown in the district, although it appears to be cultivated in neighbouring districts. The estimate of the areas under *til*, miscellaneous food, and miscellaneous non-food crops appear low. Under "Orchards and garden produce," only 200 acres have been now returned, as in the returns of 1893-94. This estimate also appears to be low.

Rajshahi.—The Collectors of Rajshahi and Bogra report that an area of 1,936 acres have been transferred from Bogra to Rajshahi; but as the transfer has not been reported by the Census Office to the Agricultural Department, the old district areas have been retained.

The area under sugarcane is very low as compared with that of neighbouring districts. Figures for the area under "Condiments and spices" are not forthcoming.

Rangpur.—No return has been given by the Collector for cross-headings 2, 3 and 4 of sub-table A2. The omission has been supplied in the Director's office by reproduction of last year's figures.

There are considerable differences between the areas under different crops returned for 1894-95 and the areas returned for 1893-94. The present estimates correspond with the returns shown in the crop forecasts of 1894-95, and are stated by the Collector to be more accurate than the figures furnished for the Agricultural Statistics of 1893-94.

Bogra.—*Vide* remark against Rajshahi as regards the district area.

The entry against cross-headings 2, 3 and 4 of sub-table A2 having been left blank by the Collector, have been furnished by the Director's office by repetition of figures for the preceding year.

Last year 2,000 acres were shown under "Miscellaneous food crops" and 2,000 acres under "Miscellaneous non-food crops." This year, the Collector has given no figures against these cross-headings, and reports that no such area appears to have been under cultivation during the year 1894-95. This report is open to doubt, considering that vegetable crops are included in "Miscellaneous food crops."

Darjeeling.—The Deputy Commissioner, as in the preceding year, has returned 2,900 acres under cinchona, evidently repeating the figure returned last year. The figure shown, 2,500 acres, has been obtained from the Financial Department of the Government of Bengal.

Jalpaiguri.—The Deputy Commissioner has returned 1,895,881 acres as the district area against 1,895,680 acres shown as the district area in the Census Report of 1891. The latter figure has been shown in the present return.

The area under forests was returned by the Deputy Commissioner as 287,590 acres. In the Forest Administration Report for 1894-95, the area is shown as 290,707 acres. The latter figure has been accepted. An adjustment has been made in cross-headings 2, 3 and 4 of sub-table A2.

No estimate has been returned by the Deputy Commissioner against cross-heading 29, "Orchards and garden produce." Explanation of the decrease of area in excess of 10 per cent., under "Miscellaneous food crops," has not been given.

Backergunge.—The Collector repeats the figures of the "Returns of Agricultural Statistics of 1893-94" for areas against cross-heading 30, "Miscellaneous food and non-food crops." The area under "Miscellaneous food crops" (122,600 acres), which include a few vegetable crops, appears high. Thirty-two thousand acres, as returned for the area under "Miscellaneous non-food crops," was stated by the Collector in 1893-94 to include *bheran* (probably meant for the castor-oil plant) and *chilly*, which is a condiment, and is therefore evidently incorrect.

Mymensingh.—The increase of net cropped area in 1894-95 as compared with 1893-94 is principally due to revision of estimates.

Tippera.—The increase in the cropped area in 1894-95 appears to be principally due to a revision of estimates against headings 1 and 32.

Noakhali.—The Collector reports that an area of 2,560 acres has been transferred from Noakhali to Backergunge, but as the transfer has not been reported by the Census office to this Department, the old district areas have been retained.

Chittagong.—The district area as returned by the Collector (1,594,841 acres) differs from that shown in the Census Report of 1891 (1,640,320 acres). The Collector remarks that the area shown by him is that found by the cadastral survey party, and must be assumed to be correct. His figure has accordingly been retained.

The area under "Forests," as given in the Forest Administration Report, is 84,874 acres. The Settlement Officer states that to this has to be added an area of 35,870 acres of Sankholas surveyed in 1894-95, making a total of 120,744 acres. This figure has been accepted.

The Collector states, that the acreages under "Rice, other food-grains including pulses, and miscellaneous food crops," as now returned by him, are practically identical with the acreages shown in the crop forecasts of 1894-95; but on comparing the figures it will be seen that there are considerable discrepancies:—

	Estimates from crop forecasts of 1894-95.	Estimates as now returned by Collector.	Difference.
	Acres.	Acres.	Acres.
Rice ...	674,100	485,900	—188,200
Other food-grains including pulses	63,000	1,700	—61,300
Miscellaneous food crops ...	16,800	12,200	—4,600

The acreages returned by the Collector this year for sub-table A3 are evidently a reproduction only of the estimates of last year.

Patna.—The area against cross-headings 2, 3 and 4 of sub-table A2 has been supplied by Director's office, as it was not given by the Collector.

The entry against column 20, "Other dyes," has been left blank by the Collector; but it is probable that safflower is grown in the district. The entry against cross-heading 28, "Fodder crops," shows the acreage under "Oats."

Shahabad.—The returns for this district were imperfect. Revised returns were called for, but have not been received. The net cropped area returned is 122,700 acres less than the area returned for 1893-94. The difference has not been explained.

Darbhanga.—Cross-headings 4 and 5 (*jowar* and *bajra*) have been left blank by the Collector, though these millets are believed to be grown in this district.

Muzaffarpur.—The Collector has returned the same net cropped area for 1894-95 as for 1893-94.

The Collector gives 47,000 acres as the area under "Miscellaneous non-food crops" against cross-heading 30, and states that it includes among other crops the area under *oats*. A large portion of the area under *oats* may have been entered against cross-heading 28, "Fodder crops," as the crop is chiefly grown as food for horses.

Saran.—In default of information from the Collector, the areas in sub-tables A1 and A2 have been reproduced by the Director's office from last year's statement.

Cross-headings 13, 20, 28, 29 ("Condiments and Spices," "Other dyes," "Fodder crops," "Orchards and garden produce") have been left blank by the Collector, who reports that figures for these crops are not forthcoming. Seven thousand three hundred acres have been returned by the Collector as the area under *jute*, which probably means *patua* (*Hibiscus cannabinus*). This area has therefore been included against cross-heading 18, "Other fibres."

Differences in area under crops exceeding 10 per cent. have not been explained.

Champaran.—The entry against *jowar* is left blank, although this crop is believed to be grown in the district. The estimate against cross-heading 9 probably includes *oats*, which is generally shown in these returns as a fodder crop against cross-heading 28.

Monghyr.—There must be other reasons than a good season, as reported by the Collector, to account for the increase in acreage under *ragi* and *mandua* from 16,600 acres in 1893-94 to 42,900 acres in 1894-95. Most probably the figures for 1893-94 were under-estimated.

Bhagalpur.—No entry has been made against cross-heading 28, "Fodder crops." *Oats*, which are believed to be grown in this district as fodder, should have been shown here.

The increase in the area under *ragi* (viz., 48,600 acres) this year as compared with that of last year has not been sufficiently explained.

Purnea.—Three millions one hundred and eighty thousand five hundred and fifty-three acres were returned by the Collector as the district area, but in the Census Report of 1891 the district area is shown as 3,195,520 acres. The latter figure has been given in the present return.

The acreage under "Tobacco" appears very high.

Malda.—Against cross-heading 30, "Miscellaneous non-food crops," the Collector repeats the figure for last year (50,000 acres). This includes the area under *oats*, which ought to have been shown under "Fodder crops," cross-heading 28.

Sonthal Parganas.—The Deputy Commissioner returns 194,720 acres as the area under forests. This is the area of the Government forest reserve administered by the Deputy Commissioner under Act VII of 1865. This forest has not yet been brought under the control of the Forest Department.

Differences in the area under crops in excess of 10 per cent. have not been explained.

Cuttack.—The Collector has again returned 665,469 acres as the area of Feudatory States; but as such areas are to be shown in the aggregate and not for each district separately, the area only of the civil district (2,325,120 acres), as given in the Census Report of 1895, has been shown against cross-headings 1 and 3 of sub-table A1. The figure against cross-headings 2, 3 and 4 of sub-table A2 has been supplied in the Director's office.

Safflower is believed to be grown in this district, though no acreage has been shown against cross-heading 20, "Other dyes."

Balasore.—The Collector has returned 1,322,404 acres as the district area. The figure shown in sub-table A1 (1,322,240 acres) has been taken from the Census Report of 1891.

Angul and Khondmals.—The Deputy Commissioner has returned 489,915 acres as the "area for which no returns exist." There is an increase of 1,042 acres in the area by village papers (cross-heading 4 of sub-table A1) over the return of last year, which the Deputy Commissioner explains is due to resettlement.

The Deputy Commissioner reports, that the area under "Miscellaneous food and non-food crops" (cross-heading 30) has been included in the area under "Orchards and garden produce" (cross-heading 29), which has been returned by him as 7,000 acres; but the area against cross-heading 30 amounts to 22,400 acres according to the estimates given in the crop reports of this Department for the year 1894-95.

The entry against cross-heading 32 ("Area cropped more than once") has been left blank. The Deputy Commissioner states that Angul being a hilly tract, the areas cropped more than once are very few and cannot be ascertained.

Puri.—The areas returned by the Collector in sub-table A2 were based on the area by village papers, cross-heading 4 of sub-table A1. For uniformity, the area against cross-headings 1 to 5 of sub-table A2 has been based, as in other districts, on the net area as shown against cross-heading 3 of sub-table A1.

The Collector has furnished no estimate of the area under "Condiments and spices" (cross-heading 13).

Hazaribagh.—The Deputy Commissioner returned 36,392 acres as the area under "Forests." To this, has been added an area of 27,080 acres, being the area of "Protected forests" added during the year 1894-95, as shown in the Forest Administration Report.

The decrease of over four lakhs of acres in the net cropped area returned for 1894-95, as compared with the area returned for 1893-94, is due to revision of estimates.

Lohardaga.—The entry against cross-headings 2, 3 and 4 of sub-table A2 has been made in the Director's office.

The Deputy Commissioner should have individually explained the differences in area exceeding 10 per cent. in the case of each crop. He states generally, that wherever there are differences they are due to estimates having been given this year of certain crops, which estimates were not available in his office last year, and also to change in climatic conditions. The area against "Miscellaneous non-food crops" appears high.

Manbhum.—Gram has been included by the Deputy Commissioner in "Other food-grains, including pulses." The area under this crop should have been shown separately. The Deputy Commissioner states, that no entry has been made by him against cross-heading 32 ("Area cropped more than once"), as no land is cultivated more than once in his district.

Singhbhum.—The area returned by the Deputy Commissioner for Feudatory States (375,000 acres) has been omitted from sub-table A1, and the area of the civil district only (2,401,920 acres) shown against cross-headings 1 and 3.

The Deputy Commissioner has shown the area under "Forests" as 654,807 acres against 787,744 acres shown in the Forest Administration Report for 1894-95. The latter figure has been accepted. It includes 520 acres of "Reserved forests" added during the year, and 132,417 acres of the Porahat reserve.

APPENDIX No. II.

	Fodder crops	,, ...	1,000	1,500	500	.....	
	Miscellaneous food crops ...	,, ...	5,000	108,800	103,800	.....	*Vide* remark above against "other food-grains including pulses.
	Miscellaneous non-food crops	,, ...	.....	28,600	28,600	.....	New estimate.
	Tea	Darjeeling ...	59,600	70,000	10,400	.....	Ordinary fluctuation in cultivation.
	Rice	Jalpaiguri ...	709,500	625,800	.....	83,700	Insufficient rainfall at the time of sowing. The seedlings at first planted were damaged.
	Maize	,, ...	1,000	2,000	1,000	.....	Greater demand of the articles.
	Other food-grains, including pulses.	,, ...	11,300	15,300	4,000	.....	
	Til	,, ...	400	300	.....	100	Due to increase under other food-grains.
	Condiments and spices ...	,, ...	.....	1,900	1,900	.....	New estimate.
	Sugarcane	,, ...	4,000	3,000	.....	1,000	Excess of rainfall at the time of ploughing, and increase in area under jute.
	Cotton	,, ...	300	500	200	.....	Greater demand of the article.
	Jute	,, ...	61,400	68,200	6,800	.....	Revision of estimate.
	Miscellaneous food crops ...	,, ...	6,000	5,200	.....	800	?
	Jowar	Dacca ...	400	.....	.....	400	Non-subsidence of flood-water at the time of sowing.
	Linseed	,, ...	8,900	7,600	.....	1,300	
	Til	,, ...	23,300	14,000	.....	9,300	
	Other oilseeds	,, ...	134,100	109,200	.....	24,900	
	Miscellaneous food crops ...	,, ...	21,600	43,300	21,700	.....	Revision of estimate.
	Miscellaneous non-food crops	,, ...	4,000	.....	.....	4,000	In the previous return acreages under thatching grass were shown against this cross-heading.

Double cropped area	,, ...	368,200	329,700	.....	38,500	The decrease is chiefly due to the decrease in the area under *boro* rice and oilseeds.
Rice	Faridpur ...	923,100	1,043,800	120,700	.....	Timely rain-fall and low land becoming cultarable owing to fluvial action.
Wheat	,, ...	2,000	1,600	.....	400	
Barley	,, ...	8,000	7,000	.....	1,000	
Jowar and bajra	,, ...	100	.....	.....	100	Unfavourable sowing season.
Gram	,, ...	8,000	7,000	.....	1,000	
Til	,, ...	14,000	9,000	.....	5,000	
Other sugar	,, ...	7,300	.....	.....	7,300	New estimate.
Jute	,, ...	70,000	85,000	15,000	.....	Favourable season.
Til	Backergunge ...	1,900	28,800	26,900	.....	Revision of estimates, due to inclusion of *bhadoi* til against cross-heading 11, and exclusion of the same from cross-heading 12 (other oilseeds).
Other oilseeds	,, ...	33,900	7,400	.....	26,500	
Orchards and garden produce	,, ...	288,600	.....	.....	288,600	The people plant fruit trees, specially betel nuts, in large numbers around their homestead lands in this district; and the lands so planted may properly be shown as orchard lands. They were returned by the Collector as not available for cultivation, but they have been transferred in the Director's office to cropped area.
Double cropped area	,, ...	88,100	104,200	16,100	.....	The area shown in the previous year was a low estimate. The increase in this year's figure is due to increase in area under rice.
Rice	Mymensingh ...	1,215,500	1,570,000	354,500	.....	Revision of estimate.
Jowar and bajra	,, ...	100	.....	.....	100	No such crops were grown in 1894-95.
Gram	,, ...	51,900	44,100	.....	7,800	Heavy rains in the latter part of October 1895, and non-subsidence of water in the fields.
Other food-grains, including pulses.	,, ...	345,900	303,000	.....	42,900	
Til	,, ...	151,000	74,300	.....	76,700	Heavy rains just before the sowing season and also revision of estimate.
Other oilseeds	,, ...	284,800	358,200	76,400	.....	Revision of estimate.
Sugarcane	,, ...	44,100	33,900	.....	10,200	Rise of water in the latter part of October 1894.
Cotton	,, ...	1,500	500	.....	1,000	
Miscellaneous food crops ...	,, ...	9,100	36,500	.....	27,400	Revision of estimate.
Miscellaneous non-food crops	,, ...	16,000	1,000	.....	15,000	
Linseed	Tippera ...	5,600	5,000	.....	600	
Other oilseeds	,, ...	68,300	51,100	.....	17,200	Due to increase in the area under rice.
Sugarcane	,, ...	13,300	14,900	1,600	.....	The attention of the people is gradually being drawn to the cultivation of this crop.
Jute	,, ...	239,800	212,000	.....	27,800	Due to high price and small stock of rice. Many low lands previously sown with jute and miscellaneous non-food crops and then with *bhadoi* and winter rice were sown only with food crops during the year under report.
Area cropped more than once	,, ...	484,900	345,500	.....	139,400	Due to increase in the area under rice.
Linseed	Noakhali ...	14,500	17,600	3,100	.....	Favourable season.
Til	,, ...	1,300	6,100	4,800	.....	Revision of estimate.
Other oilseeds	,, ...	11,200	7,300	.....	3,900	
Wheat	Patna ...	114,100	100,100	.....	14,000	Lands were under water in 1894-95.
Barley	,, ...	74,600	65,300	.....	9,300	
Jowar	,, ...	74,800	10,100	.....	64,700	Revision of estimate.
Bajra	,, ...	5,200	.....	.....	5,200	
Ragi	,, ...	.....	71,500	71,500	.....	New estimate.
Maize	,, ...	82,500	108,600	26,100	.....	The year was very favourable to the *bhadoi* crops.
Til	,, ...	1,300	1,900	600	.....	
Condiments and spices ...	,, ...	.....	3,500	3,500	.....	New estimate.
Indigo	,, ...	.....	300	300	.....	
Tobacco	,, ...	3,000	400	.....	2,600	Considerable loss sustained by the cultivators, owing to insufficient yield in the previous year.
Orchards and garden produce	,, ...	.....	16,900	16,900	.....	New estimate.
Miscellaneous non-food crops	,, ...	.....	3,800	3,800	.....	
Other food-grains, including pulses.	Gaya ...	199,500	176,500	.....	23,000	Excessive rainfall.
Other oilseeds	,, ...	39,000	97,300	58,300	.....	Owing to excessive rainfall the full normal area could not be sown in 1893-94.
Cotton	,, ...	100	.....	.....	100	Revision of estimate.
Indigo	,, ...	200	100	.....	100	The cultivation of indigo is nominal, there being no factory in the district.
Miscellaneous food crops ...	,, ...	4,500	3,300	.....	1,200	Deficient rainfall.
Miscellaneous non-food crops	,, ...	.....	400	400	.....	New estimate.
Jowar and bajra	Shahabad ...	25,800	34,200	8,400	.....	
Mandua	,, ...	.....	22,200	22,200	.....	
Maize	,, ...	35,800	40,100	4,300	.....	
Gram	,, ...	20,800	117,100	96,300	.....	
Other food-grains, including pulses.	,, ...	398,900	258,400	.....	140,500

APPENDIX No. III.

APPENDIX III TO AGRICULTURAL RETURNS OF BENGAL FOR THE YEAR 1894-95.

Explanatory Memoranda furnished by the District Officers of Differences in Excess of 10 per cent. in the figures of Table D of 1894-95, compared with those of 1892-93.

Table.	Column heading.	District.	Figures of—		Differences.		Explanation of differences by District Officers.
			Previous year.	Current year.	Plus. +	Minus. —	
1	2	3	4	5	6	7	8
D	Cross-heading 9, column 2	Burdwan ...	...	19	19	...	These 19 Government estates, which were included under cross-headings 3 and 4 of Table D of 1892-93, have been this time deducted from those headings and shown under cross-heading 9. Hence the difference in all the connected columns.
	,, 9 ,, 4	Do. ...	...	19	19	...	
	,, 9 ,, 5	Do. ...	...	987	987	...	
	,, 9 ,, 7	Do. ...	...	48	48	...	
D	Cross-heading 4 (*b*), column 7	Bankura ...	26	19	...	7	The difference in the average assessment is more apparent than real, as some roadside lands paying very small revenue, having been added to the revenue-roll of the district, have reduced the average assessment of the estates.
	,, 9 ,, 2	Do. ...	11	9	...	2	Due to the settlement of certain Government estates permanently.
	,, 9 ,, 4	Do. ...	11	9	...	2	
	,, 9 ,, 5	Do. ...	498	285	...	213	
D	Cross-heading 1 (*a*), column 4	Midnapore ...	4	10	6	...	Due to mutation of names.
	,, 2 (*b*) ,, 4	Ditto ...	672	339	...	333	Due to mistake in the return of 1892-93.
	,, 3 (*a*) ,, 4	Ditto ...	4	6	2	...	Due to mutation of names.
	,, 3 (*b*) ,, 7	Ditto ...	888	606	...	282	Due to transfer of 8 estates from cross-heading 3 (*b*) to 4 (*b*).

	,, 4 (*b*) ,, 4	Ditto ...	3,842	4,740	898	...	Due to error in the return of 1892-93.
	,, 6 (perpetuity), column 4	Ditto ...	22,218	19,798	...	2,420	
	,, 7 ,, 4	Ditto ...	...	17	17	...	Due to oversight not furnished for the return of 1892-93.
	,, 9 ,, 4	Ditto ...	62	81	9	...	Due to mutation of names.
D	Cross-heading 1 (*b*), column 4	Hooghly *cum* Howrah	9	27	18	...	
	2 (*b*) ,, 4	Ditto ...	164	253	89	...	
	,, 3 (*a*) ,, 4	Ditto ...	...	1	1	...	The increase is due to the redemption of 18 holdings in Chinsura *khas mahal* under orders of the Board of Revenue.
	,, 7 ,, 2	Ditto ...	37	55	18	...	
	,, 7 ,, 4	Ditto ...	37	55	18	...	
	,, 7 ,, 5	Ditto ...	70	78	8	...	
D	Cross-heading 1 (*a*), column 2	24-Parganas ...	4	2	...	2	
	,, ,, 4	Ditto ...	29	24	...	5	
	,, ,, 5	Ditto ...	135,480	117,663	...	17,817	
	,, 2 (*b*) ,, 2	Ditto ...	67	60	...	7	Differences due to the inclusion of the *khas mahals* and estates managed by Government for recusant proprietors, in the returns of Agricultural Statistics for 1892-93.
	,, ,, 4	Ditto ...	204	489	285	...	
	,, ,, 5	Ditto ...	714,130	589,495	...	124,635	
	,, 3 (*b*) ,, 4	Ditto ...	2,152	4,042	1,890	...	
	,, ,, 5	Ditto ...	905,814	734,856	...	170,958	
	,, 4 (*b*) ,, 4	Ditto ...	1,345	4,423	3,078	...	

Table.	Column heading.	District.	Figures of—		Differences.		Explanation of differences by District Officers.
			Previous year.	Current year.	Plus +	Minus −	
1	2	3	4	5	6	7	8
	Cross-heading 4 (*b*), column 5	24-Parganas ...	123,975	43,030	...	80,945	
	,, 6 (perpetuity), column 4	Ditto ...	11,291	...	...	11,291	Figures not available.
	,, 7 ,, 4	Ditto ...	26	...	...	26	
	,, ,, 5	Ditto ...	...	117,132	117,132	...	Figures were not available for the return of 1892-93.
	,, total ,, 3	Ditto ...	12,274	6,344	...	5,930	?
D	Cross-heading 2 (*b*), column 4	Nadia	229	258	29	...	Due to decease of some of the old proprietors of certain estates and the substitution of the names of their heirs in their place during 1893-94 and 1894-95.
	,, 3 (*b*) ,, 7	Do.	421	483	62	...	Due to increase of revenue of a few mahals resettled during 1893-94 and 1894-95.
	,, 9 ,, 4	Do.	48	42	...	6	A few of the estates shown in the return for 1892-93 with a larger number of proprietors were settled during 1893-94 and 1894-95, while a similar number of estates came under *khas* management during the year with a less number of proprietors.
D	Cross-heading 3 (*a*), column 2	Jessore ...	...	4	4	...	
	,, 3 (*a*) ,, 4	Do. ...	...	5	5	...	
	,, 3 (*a*) ,, 5	Do. ...	...	2,961	2,961	...	
	,, 3 (*a*) ,, 7	Do. ...	...	330	330	...	These estates are owned by European planters, who are subject to the law of primogeniture. In the previous return this fact escaped notice.
	,, 4 (*a*) ,, 2	Do. ...	...	4	4	...	

	,, 4 (*a*) ,, 4	Do.	...	...	4	4	...		
	,, 4 (*a*) ,, 5	Do.	...	...	45	45	...		
	,, 4 (*a*) ,, 7	Do.	...	...	18	18	...		
	,, 9 ,, 2	Do.	...	...	79	79	...		
	,, 9 ,, 4	Do.	...	...	79	79	...		
	,, 9 ,, 5	Do.	...	...	3,973	3,973	...		Due to revision of returns.
	,, 9 ,, 7	Do.	...	...	55	55	...		
	,, total ,, 3	Do.	...	15,560	4,129	...	11,431		Due to exclusion of double entries.
D	Cross-heading 1 (*b*), column 4	Murshidabad	...	8	7	...	1		The difference is due to the fact that the share of one of the 8 holders shown in the return of 1892-93 has passed to another of the coparceners.
	,, 9 ,, 5	Ditto	...	13,303	11,450	...	1,853		Decrease is due to resettlement.
D	Cross-heading total, column 3	Rajshahi	...	12,273	7,424	...	4,849		The definition of village given in the Bengal Tenancy Act could not be strictly followed in the previous year (1892-93).
D	Cross-heading 3 (*b*), column 4	Rangpur	...	1,435	1,621	186	...		Due to mutation of names.
	,, 4 (*b*) ,, 4	Do.	...	517	607	90	...		
D	Cross-heading 9, column 4	Pabna	...	130	105	...	25		The differences are due to the fact that the estates shown in the return for 1892-93 against cross-heading 9 being settled after that year were included in the entries against cross-headings 3 and 4 of the return for 1894-95, and the estates which were included in the entries against cross-headings 3 and 4 of the previous return having their terms of settlement expired, have now come under direct management, and have therefore been shown against cross-heading 9 of the return for 1894-95.
	,, 9 ,, 5	Do.	...	16,099	18,954	2,855	...		
	,, 9 ,, 7	Do.	...	428	302	...	126		

Table.	Column heading.	District.	Figures of—		Differences.		Explanation of differences by District Officers.
			Previous year.	Current year.	Plus +	Minus −	
1	2	3	4	5	6	7	8
D	Cross-heading 9, column 2	Darjeeling ...	816	22	...	794	Due to revision of returns.
	„ 9 „ 4	Ditto ...	3,108	22	...	3,086	
	„ 9 „ 7	Ditto ...	120	5,033	4,913	...	
D	Cross-heading 6 (life or lives), column 2.	Jalpaiguri ...	80	...	...	80	The 80 tenures which were granted to Rai Upendra Nath Doadar, Bahadur, have been resumed and settled with his heirs on his death as *jotedars* of estate No. 86 under direct management.
	Cross-heading 6 (life or lives), column 4.	Ditto ...	1	...	...	1	
	Cross-heading 6 (life or lives), column 5.	Ditto ...	2,958	...	...	2,958	
	Cross-heading 9 (life or lives), column 2.	Ditto ...	5	160	155	...	155 tea estates settled for periods with proprietors have been added to the previous year's figures.
	Cross-heading 9 (life or lives), column 4.	Ditto ...	5	160	155	...	
	Cross-heading 6 (life or lives), column 7.	Ditto ...	79,248	2,948	...	76,300	
D	Cross-heading 2 (*b*), column 4	Dacca ...	302	390	88	...	Due to mutations on account of purchase, inheritance, &c.
	„ 3(*b*) „ 4	Do. ...	4,880	4,385	...	495	Due to transfer to cross-heading 4 (*b*) owing to partition.
	„ 7 „ 2	Do. ...	389	713	324	...	A very large number of estates was redeemed owing to partition during 1894-95.
	„ 7 „ 4	Do. ...	623	1,127	499	...	
	„ „ 5	Do. ...	6,613	7,909	1,296	...	

	,,	total	,,	3	Do.	...	6,813	5,468	...	1,345	In 1892-93 the number was given from the Census Report, while in the statement for 1894-95 in question this has been given from the Revenue Survey papers.
D	Cross-heading 6 (perpetuity), column 2				Faridpur	...	12	15	3	...	Through a mistake, arrears for 3 estates not having been entered in Register B, Part I, the figures of column 4 were shown in the return for 1892-93 instead of the figures of column 5 as shown in this appendix.
	,,	6	,,	4	Ditto	...	38	47	9	...	
	,,	9	,,	4	Ditto	...	170	486	316	...	In the return of 1892-93, for holders of estates managed direct, whether for Government or for recusant proprietors, Government was treated as proprietor for as many times over as the number of estates, but in the present return, for holders of Government and recusant proprietors' estates, Government has been treated as proprietor as many times over as the number of Government estates and the actual number of proprietors of recusant proprietors' estates.
D	Cross-heading 2 (*b*), column			4	Backergunge	...	344	305	...	39	3 estates managed for recusant proprietors were shown in the previous return against cross-heading 2 (*b*). They are now shown against cross-heading 9.
	,,	4 (*b*)	,,	7	Ditto	...	29	15	...	14	Differences are due to a mistake in the calculation of gross revenue in the previous return.
	,,	9	,,	2	Ditto	...	307	354	47	...	Differences due to increase in the number of Government estates and to the inclusion of recusant proprietors' estates against cross-heading 9.
	,,	9	,,	4	Ditto	...	807	714	...	93	
	,,	9	,,	7	Ditto	...	1,830	1,234	...	596	Mistake in the calculation of gross revenue in previous return.
	,,	total	,,	3	Ditto	...	4,704	3,221	...	1,483	Census figures were shown in the previous return, while Survey figures are now shown.

Table.	Column heading.	District.	Figures of—		Differences.		Explanation of differences by District Officers.
			Previous year.	Current year.	Plus +	Minus −	
1	2	3	4	5	6	7	8
D	Cross-heading 2 (*b*), column 4	Mymensingh ...	112	218	106	...	
	,, 3 (*b*) ,, 4	Ditto ...	8,065	11,020	2,955	...	
	,, 4 (*b*) ,, 2	Ditto ...	6,538	7,325	787	...	
	,, 4 (*b*) ,, 7	Ditto ...	17	15	...	2	Due to partition of estates.
	,, 7 ,, 2	Ditto ...	337	734	397	...	
	,, 7 ,, 4	Ditto ...	616	1,259	643	...	
	,, 7 ,, 5	Ditto ...	898	2,947	2,049	...	
	,, 9 ,, 2	Ditto ...	...	60	60	...	
	,, 9 ,, 4	Ditto ...	...	101	101	...	By mistake no figures were shown in the previous year's return.
	,, 9 ,, 5	Ditto ...	...	11,734	11,734	...	
	,, 9 ,, 7	Ditto ...	...	214	214	...	
	,, total ,, 3	Ditto ...	25,600	10,638	...	14,962	In the return of 1892-93, one village appertaining to more than one estate was reckoned as many villages as there were number of estates to which it appertained. In the present return, the number of villages has been taken from Mauzawar Register C.
D	Cross-heading 1 (*a*), column 4	Tippera ...	11	30	19	...	Due to mutation and inclusion of proprietors twice or oftener, according to number of estates.

	,, 2 (*b*) ,, 4	Do.	...	416	238	...	178	Due to transfer of estates by auction for arrears of revenue and to mutation of names of managers in lieu of several proprietors having no specific interest.
	,, 3 (*b*) ,, 4	Do.	...	1,463	3,961	2,498	...	Due to mutation and inclusion of proprietors twice or oftener, according to number of estates.
	,, 4 (*b*) ,, 4	Do.	...	2,816	7,346	4,530	...	
	,, 6 (perpetuity), column 4	Do.	...	152	866	714	...	
	,, 9 ,, 4	Do.	...	139	157	18	...	
	,, total ,, 3	Do.	...	7,221	4,165	...	3,056	In the return of 1892-93 the number of villages was given from the Mauzawar Register C, while it is now given from the Survey Village Register.
